Dear Friend,

What if you could get major returns for your retirement in any market by knowing just three things, choosing assets and investments that have these 3 things and then just apply a little old fashioned self-discipline?

We finally cracked the code on **how billionaires get rich and become the Fortune 400** by using three easy techniques that once you know and use them, you can start generating effortless returns but it won't happen overnight.

After years of examining my estate planning clients' portfolios and asking them questions about their investments I noticed they didn't have a clue on the strategy or other important issues. THEN, I discovered that **the entire financial community was doing it WRONG!**

What I mean is that they all had become ZOMBIES to the pie chart and didn't even know it was designed for institutions and not **individual investors just like YOU!** Well imagine my shock in this discovery which lead me to research three self-made billionaires who were doing things differently and getting incredible results...like in the BILLIONS.

I started putting it all together cracking the code with what was missing and piecing it together and then I decided to get it out in my book "The 3 Secret Pillars of Wealth" so that I could reach as many people as possible and stop the MADNESS!!

Should you be relying on your pension plan or the administrator your company has?

Not if you know the **30 serious errors** that can happen with your pension like –

1. Your employer's plan calls for all compensation paid to you to be used in determining your retirement benefits. Your bonuses and overtime were deleted from the computer run resulting in a portion of the contributions and benefits that should have been accumulated for you being unpaid.
2. The administrators credited your profit sharing account with the forfeitures and earnings from the wrong year.
3. You are leaving a profit sharing plan and the administrators have valued your account on the basis of the fair market value of the assets at the beginning of the year instead of at the end of the year when the stock market had increased substantially.
4. The administrators have cashed you out of the plan ... **more inside.**
